

# EGF2026 Sensing workshop

April 12, 2026

University of Évora campus, 8:30- 17:30

## Aims

- Learn about proximal and remote sensing activities within the EGF community
- Foster networking and collaboration between individuals
- Identify the potential of sensing to improve grazing management for farmers
- Publish the notes of the workshop as a paper at the next EGF conference

## Programm

8:30	Departure from Évora to Mitra campus
9:30	Getting to know each other and our projects
10:30	Coffee
11:00	Group discussions How can grassland <i>research</i> benefit from grassland sensing (including remote and proximal sensing as well as animal-borne sensors)? Identify knowledge gaps and technical limits.
12:30	Lunch
13:30	Group photo and field visit on Mitra campus with demonstration
15:00	Coffee
15:30	Group discussions How can grassland <i>farmers</i> benefit from grassland sensing? Identify potential, pitfalls and challenges
16:30	Future activities of the EGF grassland sensing working group
17:00	Closing and return to Évora Colégio Espírito Santo – UE for welcome drink
